

Why One-Stop Voting, Early Voting, and No-Excuse Absentee Ballots MUST STOP

A Message from Website Creator: The Democrats are using (and abusing) One-Stop Voting, Early Voting, and the No-Excuse Absentee Ballots to drastically alter and manipulate our elections. They were also doing this, until the recent changes in election law, regarding the No Picture ID required to vote.

During Early Voting, the Democrats are able to empty out the Homeless Camps, in order to round up people by the bus load to take to the One-Stop Voting sites. When you spread out the time to vote (like with several weeks), you give time for the cheaters to cheat. Since Homeless Camps are mainly found in metropolitan areas, these areas (not rural counties) show a major shift in voting patterns.

Also in many of these Metropolitan areas with major university campuses, the Democrats have registration drives of college students. After these students graduate and/or move away, they are often left still on the voter rolls. The Democrats are then able to use these registrations to cheat. This is another reason why picture ID is so crucial in order for fair elections.

The Democrats are taking similar tactics with the elderly and the mentally challenged with the use of the No-Excuse Absentee Ballots and with the Early Voting period. They are able to go to the nursing homes to gather up Absentee Ballots from people who are commentosed and/or have dementia – people who have no business voting.

Here in North Carolina during the 2020 General Election, the Democrats also went after the very low-information voter. There were roughly 190,000 (out of 5.5 Million) ballots cast in that election where the voter checked the names of candidates for only one (1) to five (5) elected offices. These people were so lazy, afraid (possibly voting under duress and pressure), and/or uninformed that they couldn't even fill out the rest of the ballot – even with those races that had an “R” or “D” beside the names. I wonder how many of these represented the mentally-challenged and/or homeless population???

This website is dedicated to showing PROOF POSITIVE that our elections have become altered and manipulated in recent election cycles. We have discovered, by a new and much better method of analyzing election results, that here in North Carolina for the 2020 General Election, there were 1.2 Million as what is described as an “Out-of-Line” bloc of voters – according to historical trends and margins.

We must get rid of the One-Stop and Early Voting; and you should have a really good excuse to qualify for an Absentee Ballot. We must go back to One Day (Election Day) and Precinct Voting – if we are to preserve our Republic.
