

Billboard Advertising Campaign

Getting the Word Out About What Is Really Happening to Our Elections

Design: For Free And Fair Elections

Goal is a Statewide Campaign with 3 Simple Billboard Messages:

- *In 2020 Here In NC, Why Was ONE Party One MILLION Votes Off Their Possible Trend Line???*
- *See Letter to Vice President JD Vance About What Is Really Happening In NC Elections...*
- *What The Republican Establishment Does NOT Want YOU To Know About Our Elections...*

Billy Parker

It is absolutely crucial that we get the word out about what is really happening to our elections. Finally, we have the numbers to prove something very unusual is in fact happening. Up until now, the main emphasis has been all about searching for election fraud; and while that does exist, there is actually a much bigger problem for most Red (and even Purple) states such as North Carolina – the Abuse of Early Voting and No-Excuse Absentee Ballot that is altering the election results. This is where the really big numbers start to come in. Who knows what our elected officials will do, if anything, about the problem. My main concern, however, is simply to try to educate the citizens of North Carolina as to the abuse and to what is actually happening with our elections.

It is expensive to get the word out to everybody about this most important issue. I plan a two phase strategy involving billboards. **Phase I** is simply to get a billboard up in the Capital City of Raleigh and a series of 3 billboards up along an Interstate Highway. Once people see this campaign is for real, then raising money for a more expensive statewide **Phase II** campaign becomes a lot easier. But we have to start somewhere! Won't you help with a donation?

Phase I Of Billboard Advertising Campaign

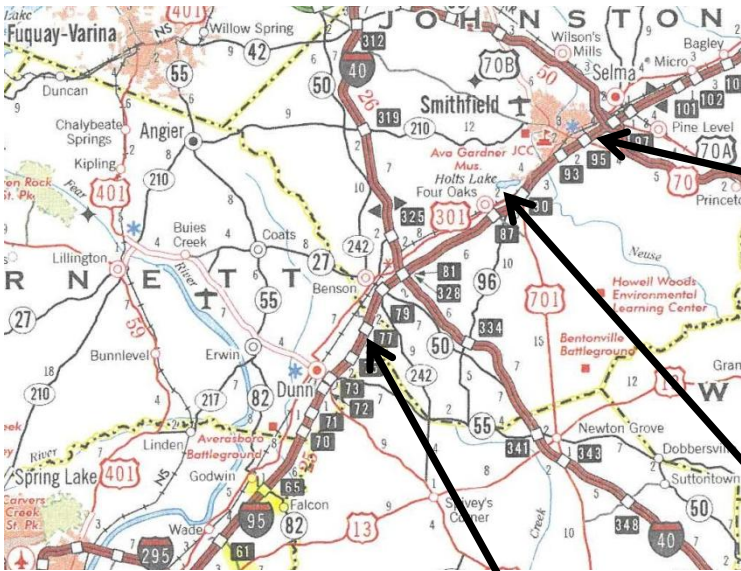

Billboard in Major NC City

North Raleigh – One Message for 4 Weeks

Billboards along a NC Interstate

I-95 from Dunn to Smithfield – 3 Signs for 16 Weeks

Cost of Phase I Advertising Campaign:

Major NC City:

North Raleigh/Capital Blvd @ Old Buffalo Rd	–	Message for 4 Weeks	<u>\$9,500</u>
Total Cost of City Advertising:				\$9,500

Along NC Interstate Highways:

I-95 @ MM 76 / Turnage Auto Repair	–	Message #1 for 16 Weeks	\$2,575
I-95 .2 MI S/O US 701	–	Message #2 for 16 Weeks	3,575
I-95 E/S .10 MI N/O Exit 95	–	Message #3 for 16 Weeks	<u>2,975</u>
Total Cost of Interstate Hwy Advertising:				<u>9,125</u>

Total Cost of both City and Highway Advertising in Phase I: \$18,625

Estimated Cost of Phase II Advertising Campaign:

Major NC Cities:

Asheville	–	1 Sign – Message for 4 Weeks	\$2,800
Charlotte	–	1 Sign – Message for 4 Weeks	4,200
Winston Salem	–	1 Sign – Message for 4 Weeks	3,600
Greensboro	–	1 Sign – Message for 4 Weeks	3,900
Durham/Chapel Hill	–	1 Sign – Message for 4 Weeks	9,000
Raleigh	–	1 Sign – Message for 4 Weeks	9,500
Fayetteville	–	1 Sign – Message for 4 Weeks	2,700
Greenville	–	1 Sign – Message for 4 Weeks	2,500
Wilmington	–	1 Sign – Message for 4 Weeks	<u>3,300</u>
Total Cost of City Advertising:				41,500

Along NC Highways:

3 Billboards on I-40 between Asheville and Hickory	–	3 Mesg for 16 Weeks	..	\$16,000
3 Billboards on I-40/85 between Greensboro & Durham	–	3 Mesg for 16 Weeks	..	24,000
3 Billboards on Hwy 1 between Pinehurst and Apex	–	3 Mesg for 16 Weeks	..	<u>12,000</u>
Total Cost of Highway Advertising:				<u>52,000</u>

Total Estimated Cost of both City and Highway Advertising in Phase II: \$93,500

The People Have To Know What Is Happening

Excerpt from Letter to JD Vance, dated January 15, 2026:

For North Carolina, election law by the Legislature has constantly been changing over a number of decades. Absentee ballots by mail are available 60 days before most elections. It used to be that Absentee ballots were for people who could not get to the polls on Election Day because of illness, disability, or travel. But now, it has been turned into a form of “convenience” voting. So by requesting an Absentee ballot (for any reason), you can technically vote from the comforts of your own living room (where friends, family, and possibly “others” can influence the vote). What is called “One-Stop Early Voting” here in North Carolina is another thing that is of concern. It starts during a period beginning 18 days before an election and ending on the Saturday before the election. And voting at your own precinct is not even an option during early voting; instead, there are a couple of centralized “One-Stop” locations scattered throughout the county to where you go vote. (This makes it real easy if you are in the business of busing people to the polls.) These law changes began with the General Assembly in 1999, taking effect with the following even-year general election. And by 2008, approximately half of all ballots cast were done during Early Voting.

Again, when you change the way elections are conducted, you change the outcome. I contend that the North Carolina Legislature has given the Democrat Party an unfair advantage, and what you have now is different forms of “vote harvesting” taking place. With vote harvesting, the number of ballots cast does tend to go up. Maybe the 50% increase in the level of voting that we have seen here in North Carolina might have something to do with this. Also realize for a general election, that on average, only about 60% of registered voters actually show up to vote; but there is wide variance with this percentage per election cycle – it can easily go up or down by 5%. And if you can increase this percentage slightly, say up to 65% or 70%, then you can easily change the outcome to an election. Consider that the Democrats now have time to collect and take to the polls all their registered voters, which was nearly impossible, logistically, for one-day Election Day voting. They collect people from the senior centers. The churches often use their buses to take the congregation to the polls during Early Voting. I’m sure homeless camps are emptied out to make sure they are taken to the polls also. And with the “One-Stop” sites, this process has been made super easy – you don’t even have to take the voter to their own precinct any longer. Anyone who works the centralized Early Voting sites will tell you that buses are constantly showing up to take people to the polls; and they are usually full of Democrat voters. (People voting Republican usually don’t have a problem getting to the polls on their own and in their own cars – no buses needed!) I believe rounding people up and putting them on a bus to take to the polls is certainly a form of vote harvesting. Also with vote harvesting, you often have a centralized figure orchestrating things. During Covid, you had the head of the Democrat Party instructing people to request an Absentee Ballot. With people sitting around home not working because of Covid, I’m sure a lot more people voted by absentee – some of which would not have voted at all. And now the government makes it public during early voting as to who has voted and not voted on a daily, and even hourly, basis; so the Democrats can go straight down their roster to make sure they get everyone to the polls to vote or to vote by absentee. Under the cover of Covid in the 2020 general election, a record high of 75.07% of the registered voters in North Carolina actually voted – far more than the average historical level of approximately 60% (+/- 5%). Do you think this is just a coincident or maybe vote harvesting might be taking place – because election laws were changed?

Excerpt from Letter to Members of the NC General Assembly, dated May 12, 2026:

Realizing that neither side could get 100% of their disinterested people to the polls pre-2000, back then Election Day was a “game” involving a “race” to get your voters to the polls. To enhance your chances to win, you should do everything possible to try to get as many of your own people out within the confines of the full day of voting – which was the “race to the polls.” But when you now expand the time to vote, with 18 additional days of Early Voting and 60 days to get in an Absentee Ballot, you completely change the nature and characteristic of both the “game” and the “race” – you open the possibility for the results to be altered and manipulated, particularly when information is made available on who has voted and who has not. Harvesting ballots is illegal! This, however, has become replaced with harvesting voters, a busload at a time. Harvesting voters has now become the game. In the case of mailed-in ballots, repeated badgering of your voters becomes possible. Founding Fathers did not envision creating opportunities for these types of extra-personal manipulations.
